Candied Fruit

The selection and transformation of fruit into noble ingredients, the artisan production of Candied Fruit, and in particular candied cherries, are the most important and traditional activities of the Company.

Cesarin's Candied Fruit is its core business both for tradition and importance: the production methods have been handed down through the years and perfected along the way. The final products created with a traditional method, by means of a slow osmotic process, preserve all the physical properties such as the smell, consistency, form and colour of the fruit, while acquiring the flavour typical of the best workmanship. Cesarin Candied Fruit, in all its varied forms (whole fruit, strips, halved fruit, channel and bars) and thanks to its captivating range of colours and flavours finds its best use is not only as a filling in baked goods but also as an ingredient for the decoration of sweets and ice cream.
